ABOUT OUR PRODUCT

All our portraits are printed using and HP Design Jet Z3200ps printer on the best quality photo papers and canvas. The inks we use are pigmented inks, the same mineral based colourants used in artist's oil paints for hundreds of years. Independent accelerated aging tests performed on these inks and papers indicate objectionable fading will not occur in normal use for 150 years and more. Conventional ink jet prints use dye based inks or chemically processed photographic papers and can fade objectionably in as little as 5 years. We guarantee accurate colour and density on our prints!
